This Syllabus is brought to you for free and open access by the Course Syllabi at ScholarWorks at University of Montana. It has been accepted for inclusion in Syllabi by an authorized administrator of ScholarWorks at University of Montana. For more information, please contact scholarworks@mso.umt.edu.

BIOH370Syllabus Spring 2015

Human Anatomy and Physiology for Health Professions II

Course Information:

Instructor: Laurie Minns, PhD

Office: HS412

Phone: 406-243-6013

Office Hours: Monday and Wednesday 10am-11am (or by appointment)

Email: Laurie.Minns@mso.umt.edu

General Course Information:

Human Anatomy and Physiology is a 4-credit lecture/laboratory combined, two-semester sequence course (BIOH 365 and BIOH 370). The lecture focuses primarily on physiological and functional processes whereas the laboratory portion of the class focuses on anatomical structure using prosected cadavers, simple physiological experiments and computer simulations. There is overlap between the lecture and laboratory components but based on the limited laboratory time, there will be times when lecture material and lab material do not overlap.

This course predominately serves students majoring in biology, pre-medical, pre-nursing, pre-physical therapy, other pre-health care professions and health and human performance.

The two-semester sequence is divided as follows:

BIOH 365	BIOH 370
Body Plan & Organization	Endocrine System
Homeostasis	Cardiovascular System
Chemistry & Cell Biology Review	Lymphatic System & Immunity
Histology	Respiratory System
Integumentary System	Digestive System
Skeletal System & Articulations	Metabolism
Muscular System	Urinary System
Nervous System	Fluid/Electrolytes & Acid/Base Balance
Special Senses	Reproductive System

Required Prerequisites:

College Chemistry: CHMY 121N (CHEM 151N): Intro to General Chemistry -or- CHMY 141N (CHEM 161N): College Chemistry

College Biology: BIOL 110N (Principles of Biology) -or- BIOH 112 (Introduction to Human Form and Function I)-or- BIOH 113 (Introduction to Human Form and Function II).

A grade of C- or higher in BIOH365

**** You are at risk of not doing well in this course without the prerequisites.****

Recommended Prerequisites: BIOB 260: Cellular and Molecular Biology, BIOB272.

Required Textbook Information:

Principles of Anatomy and Physiology 14th edition by Gerard J. Tortora, Bryan H. Derrickson - John Wiley & Sons (2014) – ISBN 978- 1-118-34500-9 plus the Wiley Plus online package (available at the University of Montana Bookstore).

Atlas of Anatomy by Anne M. Gilroy, Brian R. MacPherson, Lawrence M. Ross - Thieme (2008) –ISBN-978-1-60404-062-1 or the 2nd edition of the Gilroy atlas or the electronic edition (available from www.thieme.com)

Computers and Course Website Information

Students are expected to be familiar with computers and the Internet. Students are responsible for their own software and computer equipment maintenance and setup as recommended by the University of Montana.

<http://umonline.umt.edu/student-support.php>

Class-Specific Computer Requirements:

- Students must download and complete *Terms to Know* and other assignments prior to laboratory sessions. Students are expected to have a 'back up plan' if personal computers become compromised.
- The University of Montana maintains several computer labs on campus:
<http://www.umt.edu/it/support/computerlabs/default.php>
- Students are expected to download copies of course information from the Moodle website and to check email for class announcements.
- **For technical support for using Moodle, please contact UM IT support:**

<http://www.umt.edu/it/support/default.php>

Course Goals:

Upon successful completion of this two-course sequence, you will have conceptual and practical information regarding the anatomy and physiology of the human organism.

Course Objectives:

- 1) Gain an appreciation for the complementarity of anatomical form with physiological function.
 - 2) Understand how the body systems work to maintain homeostasis.
 - 3) Use critical thinking skills to predict the consequences of homeostatic imbalances on human form and function.
-

Course outcomes are based on the Human Anatomy and Physiology (HAPS)

Learning Objectives:

1. Demonstrate understanding of chemical and biological principles and knowledge that serve as the foundation for understanding human anatomy and physiology.
- 4) Understand and analyze cellular processes governing development, growth and normal function of the human body.
- 5) Understand the processes involved with maintaining homeostasis and anticipate what may occur when homeostatic balance mechanisms are lost.
- 6) Demonstrate practical knowledge of human gross and microscopic anatomy using human cadavers and prepared histological slides.
- 7) Identify structures in the body and analyze their relationship with other structures.
- 8) Describe development, regeneration and normal function of body systems
- 9) Understand the cellular and physiological mechanisms that drive tissue formation and function.
- 10) Employ the scientific process for understanding principles of anatomy and physiology.
- 11) Analyze A&P observations and data and determine the potential physiological consequences.

Lecture-Specific Course Outcomes:

The beginning of each set of slides used in lecture and in lab detail specific learning objectives addressed in that given unit.

Course Information:

Teaching methods: Lecture and Laboratory

Student Responsibilities:

- 1) Students are expected to complete the required reading and pre-laboratory assignments prior to class meeting times.
- 2) Students are expected to log on to the course Moodle site regularly to download course materials and read updated course announcements.
- 3) Regular attendance in lectures and laboratory is strongly recommended for successful completion of the course.
- 4) If absence from lecture or laboratory is necessary due to illness, it is your responsibility to obtain notes from another student.
- 5) Students are expected to be respectful during all course meetings and during meetings with course staff and Dr. Minns. Students who fail to do so will be subject to the student conduct code.

Course Policies

Dr. Minns and the Laboratory Instructors follow academic policies as stated in the 2014-2015 UM Catalog. Students are responsible for being familiar with these policies.

<http://www.umt.edu/catalog/>

These policies include but are not limited to:

- Student Conduct (http://life.umt.edu/vpsa/student_conduct.php)
- Class attendance
- Credit/No Credit Grading
- No more than 18 CR credits may be counted toward graduation. Courses taken to satisfy General Education Requirements must be taken for traditional letter grade. Courses required for the student's major or minor must be taken for traditional letter grade, except at the discretion of the department concerned.
- A CR is given for work deserving credit (A through D-) and an NCR for work of failing quality (F). CR and NCR grades do not affect grade point averages. The grades of CR and NCR are not defined in terms of their relationship to traditional grades for graduate course work.
- Election of the credit/no credit option must be indicated at registration time or within the first 15 class days on CyberBear. After the fifteenth day, but prior to the end of the 30th day of instruction, an undergraduate student may change a credit/no credit enrollment to an enrollment under the A F grade system, or the reverse by means of a drop/add form.
- The University cautions students that many graduate and professional schools and some employers do not recognize non traditional grades (i.e., those other than A through F) or may discriminate against students who use the credit/no credit option for many courses. Moreover, students are cautioned that some degree programs may have different requirements regarding CR/NCR credits, as stipulated in the catalog.
- Audit
- Incomplete Grading Policy

Plagiarism

- Plagiarism is the representing of another's work as one's own. It is a particularly intolerable offense in the academic community and is strictly forbidden. Students who plagiarize may fail the course and may be remanded to Academic Court for possible suspension or expulsion. (See Student Conduct Code section of this catalog.)
- Students must always be very careful to acknowledge any kind of borrowing that is included in their work. This means not only borrowed wording but also ideas. Acknowledgment of whatever is not one's own original work is the proper and honest use of sources. Failure to acknowledge whatever is not one's own original work is plagiarism.

Students with Disabilities:

The University of Montana assures equal access to instruction through collaboration between students with disabilities, instructors, and Disability Services for Students. If you think you may have a disability adversely affecting your academic performance, and you have not already registered with Disability Services, please contact Disability Services in Lommason Center 154 or 406.243.2243. I will work with you and Disability Services to provide an appropriate modification.

Cell Phones and other electronic devices

The use of cell phones and other electronic devices (including cameras, video recorders) is STRICTLY prohibited during all class times, including examinations.

Disruptive behavior

Students who are being disruptive in lecture by talking, texting or playing computer games will be asked to leave the classroom. Such behaviors impact the learning of other students in the classroom and will not be tolerated. Re-admittance to class is at the discretion of the instructor.

Evaluation Methods:

Your course grade will be determined by your performance in the lecture as well as the lab, according to the following evaluation methods:

Grading System:

Final Grades will be based upon a total of 600 points (300 points from Lecture Assessments, 300 points from Laboratory Assessments). Please note that the lecture and laboratory components are each worth 50% of your final grade. *Laboratory and Lecture Material may overlap. Final grades will be computed from the total # of points earned /600 and students will receive the same 'grade' for BIOH365 Sec.00 as their laboratory section.*

Lab Graded Activity	# of points toward grade
Lab Practical Exams (2x 80 pts)	160
Lab Quizzes (9x10pts, drop 1 lowest)	80
Lab TTK (10x3pts)	30
Case Studies (2x15pts)	30
Lab Total	300
Lecture Graded Activity	# of points toward grade
Lecture Exams (3x80 pts)	240
Lecture quizzes	50
Pre- and Post term assessments (2x5pts)	10
Lecture Total	300

Grades will be calculated based upon the following system:	
Grade	Percent of Total Points
A	94-100%
A-	90-93%
B+	87-89%
B	84-86%
B-	80-83%
C+	77-79%
C	74-76%
C-	70-73%
D+	67-69%
D	64-66%
D-	60-63%
F	59% and Below

Pre-course Assessment on Moodle:

During the first week of the semester, students are required to take a closed-book pre-course assessment on Moodle.

- Students will receive 5 points for completing the pre-course assessment on Moodle regardless of assessment performance. Five points will be awarded at the end of the semester when final grades are computed.
- Students who do not complete this quiz will receive a pre-assessment score of 0.
- Once a student enters the Assessment on Moodle they must finish.
- This pre-course assessment is used to determine the background knowledge of students prior to the beginning of BIOH370. It is also used by Dr. Minns to determine which areas of study might require more or less attention during lecture and to determine areas of interest of students in the class.
- Points will not be awarded if students do not make a good faith effort in completing the post-term assessment.

Post-course Assessment on Moodle:

- During the last week of classes, students are required to take the Post-Class Assessment on Moodle.
- Students will receive 5 points for completing the assessment regardless of assessment performance; five points will be awarded at the end of the semester.
- Students who do not complete the assessment will receive a grade of 0.
- This assessment will be closed book and timed. Please do your best work so that Dr. Minns can determine student performance during the semester. Some questions in the Post-class assessment may be on the Final exam.
- Once a student enters the Assessment on Moodle they must finish.
- Points will not be awarded if students do not present a good faith effort in completing the post-term assessment.

Lecture Examinations:

Students are expected to prepare, and be present for lecture and laboratory examinations on the scheduled dates and at the scheduled time. No student will be allowed to begin any examination later than ten minutes after the scheduled start time for that exam. Prior to the end of the allotted exam time, students will be alerted that 10 minutes remain. Students must turn in exams at the end of the allotted exam time. Be on time and prepared to take a 'closed book exam'. No outside materials, including (but not limited to) papers, notebooks, calculators, or cell phones are allowed during exams.

There are two lecture exams and one final exam (semi-cumulative). *Laboratory and Lecture Material may overlap.* Each lecture exam (midterm exams and the final exam) is worth 80 points.

Lecture Quizzes

Approximately each week, students will be required to take quizzes deployed online or distributed in-class. Online quizzes will be taken through the WileyPlus online course supplement. Students are encouraged to work together to complete these quizzes. Late submissions will not be accepted and there is no opportunity to make up missed quizzes. Some quizzes may occur during class times and if students miss these quizzes

for any reason they may NOT be made up. Students may attempt the quiz up to two times and the highest score will be used to calculate the final grade.

Laboratory Quizzes

Each week, each laboratory will have either an 'in-house' or take-home quiz worth 10 points. If the following conditions are met, you may attend another lab section to take and get credit for the weekly quiz if you cannot attend your regularly scheduled lab:

1. **You have received permission from your lab instructor prior to your normally scheduled lab time.**
2. **You have received permission from the lab instructor whose lab you will be attending prior to the beginning of the lab section.**

If either of these conditions is not met for any reason, you may not take the quiz and receive credit.

Laboratory Terms to Know (TTKs)

Prior to each lab meeting, students are required to completely fill out the upcoming lab's Terms to Know (TTKs) available on the course moodle page. Each TTK packet must be completed in its entirety for students to earn credit for completion. Completing the TTKs are an important part of preparing for the upcoming lab and they are a valuable study tool for upcoming in class and take home quizzes. Your lab instructor will review the points awarded for the completed TTKs in the lab.

Laboratory Practical Exams

Laboratory Instructors will discuss the breadth and scope of Laboratory Practical Examinations.

Two practical examinations each worth 80 points will be administered during the semester. The laboratory practical examinations cover only the new material presented since the previous exam, but may incorporate some lecture material. [Please note that students enrolled in the Honors laboratory section will have a cumulative second practical laboratory exam.] "Make-ups" of practical exams are not available since these exams are based on the use of slides and actual laboratory specimens. The regular lab practical exam is 50 minutes long and will begin at 20 minutes past the hour (this is 10 minutes after regular labs begin; if your lab regularly meets at 10:10am, your lab practical will begin at 10:20am). The specific format of the lab practical exam will be discussed in your laboratory.

Make-up Assignments:

NO "make-up" opportunities on missed assignments are available.

Final Examination

Please note the final examination policy from the University of Montana Undergraduate Course Catalog 2014-2015 (<http://www.umt.edu/catalog/>)

"Final examinations for the semester are scheduled in two hour segments, one for each course. ... The time scheduled for final examinations is the only time period during which final examinations are to be given..."

Students may seek relief from writing more than two examinations during the same day. Students who are scheduled for more than two examinations may contact the appropriate faculty to arrange an alternate testing time during the scheduled final examination period. If satisfactory arrangements cannot be made, the student should seek the assistance of his or her dean."

For BIOH365, the 'alternate testing time' will be a time after the originally scheduled examination and will require written documentation of more than two final examinations on a given day. The exam administered during the 'alternate testing time' may be different than the exam administered during the scheduled exam time. Written documentation for the Final exam must be provided to Dr. Minns by Monday November 29, 2014.

Grade Disputes

If a dispute should arise regarding the answer to a lecture or laboratory examination or quiz item, the judgment of the faculty member will be final. *Any disputes regarding test items or examination grades must be communicated by email within 5 days after the exam has been returned to the class.* Lecture Exam keys will be posted outside Dr. Minns' office. Laboratory Practical Exam Keys will be posted outside of HS101. Under no circumstances will examination grades be reconsidered after this five- day window. Due to grading deadlines, an announcement regarding the grade dispute window will be announced in the lab and in lecture with regard to the second lab practical and final lecture exam.

Make-up Examinations

Make-up examinations are reserved for those students who cannot take an exam on the originally scheduled date due to:

- **A documented illness**
- **Documentation of participation in a University-sanctioned activity**
 - **Participation in a University-sanctioned activity requires written communication from the University of Montana Office of Academic Advising**
 - **Student athletes must provide documentation to Dr. Minns within the first week of classes**

Before the scheduled exam or quiz time, you must explain the nature of your problem by calling or email:

- **For Lecture Examinations only: Dr. Minns**
- **For laboratory quizzes only: Your laboratory instructor and Dr. Minns**

After receipt of *written* documentation supporting the reason for absence is received, Dr. Minns (lecture) and your laboratory instructor (laboratory section) will determine whether a make-up exam is merited and Dr. Minns or your laboratory instructor will schedule the make-up exam. Please note that the make-up exam may be different than the original exam. Lecture make-up exams will contain short answer and essay questions. If you do not contact your instructor prior to the scheduled exam, absolutely no make-up will be available.

An official UM student email address must be used for all correspondence.

Additional Teaching Staff

Laboratory Instructors:

Heather Labbe (honors lab)
Danielle Stanfield
Cara Saxon
Nicki Roessing

Undergraduate Teaching Assistants (UGTAs):

Each laboratory section will have at least one undergraduate teaching assistant to assist with instruction. UGTAs are not permitted to bring students to the lab outside of normal laboratory hours. They are not available for private tutoring.

Students interested in becoming an UGTA for future BIOH365 and BIOH370 courses may apply for UGTA positions in the Spring (the deadline is March 13). In order to be eligible to become a UGTA, students must earn a grade of B or higher in BIOH365 and BIOH370 and must fill out an application. Promising candidates will be invited for an interview. UGTAs are undergraduate students who enroll in BIOH480 or BIOH481. TAs must also co-enroll in the cadaver dissection course. Interested candidates are encouraged to talk with Dr. Minns and your laboratory instructor and UGTAs.

Tutors:

Free tutoring may be available for this course provided by students enrolled in the Human A&P tutoring course. These students must have earned a grade of B or higher in BIOH365 and BIOH370 and applied and interviewed for the position. They will provide posted tutoring hours and reviews prior to lecture exams. Tutors are not allowed to provide tutoring on a personal or private basis and will only conduct tutoring during announced hours. Students interested in becoming tutors for future BIOH365/370 courses are encouraged to talk with Dr. Minns.

Access to the Laboratory Outside of Regularly Scheduled Class Hours

Access to the laboratory is only available during scheduled 'Open Labs.' Your laboratory instructor will inform you of 'Open Lab' times. Access outside of your scheduled lab and 'open labs' is not permitted.

Laboratory Specimen and Cadaver Information and Policies.

Much of your education in anatomy will result from a selfless donation of thoughtful individuals who voluntarily chose to donate their body to the Montana Body Donation Program that supports WWAMI education programs. *WWAMI (Washington, Wyoming, Alaska, Montana and Idaho) is a cooperative regional medical education program of the University of Washington School of Medicine that provides places for twenty Montana students per year in its entering medical student class. These twenty students take their first year of medical school at Montana State University and complete their studies at the University of Washington in Seattle and at community clinical training sites throughout the Northwest.*

Respect for the Cadavers:

These donated cadavers are gifts and must be treated with the dignity and respect they deserve. It is inappropriate to make disrespectful comments within and outside of the laboratory. You will observe professional conduct while in the lab and outside the lab. Naming of the cadavers, unnecessary horseplay, posing of the cadavers, etc WILL NOT BE TOLERATED. These cadavers are the result of gifts from fellow Montanans and their families who believed strongly in the benefit of health science education.

<http://www.montana.edu/wwwami/bodydonate.html>

Rules for Cadaver Use in the Anatomy and Physiology Labs:

- 1) The cadavers used in this lab were obtained from the Montana Body Donation Program at Montana State University. Cadavers are donated to MSU according to state regulations. Persons donating their body receive no financial compensation; this is truly their ultimate gift. Hence it is imperative that proper respect be paid to the cadaver at all times.
- 2) Only students enrolled BIOH 365, BIOH 112 and teaching staff are allowed into the cadaver lab at any time. No minor children or other family members are to be brought to the open lab times. If you see someone in the lab who you believe is unauthorized, notify laboratory personnel and/or ask him/her to leave the lab.
- 3) Body parts, tissue, etc must not be removed from the lab.
- 4) No cameras, camera phones or electronics with photo or video capability are allowed in the lab. Photography is prohibited.
- 5) Please be careful, the cadaver dissections will be used and material reviewed in other lab sections by other students. Keep the dissections moist and well covered when not working on that portion of the cadaver. Keep doors to lab closed and locked to keep security intact; students should police the lab.

Laboratory Safety in the Anatomy and Physiology Labs

- 1) In case of an emergency, dial extension 4000 to report serious injuries. Phones are located throughout the Health Sciences Building. The Health Sciences main office is in room 104.
- 6) First Aid supplies are available in the supply room for HS 101 (the anatomy lab), HS 104 (the main office) and HS 403.
- 7) You are required to wear disposable gloves (nitrile or neoprene, latex gloves are not acceptable) at all times while working with the cadaver dissections. Cadavers are embalmed with a fluid containing propylene glycol, ethyl alcohol, phenol and formaldehyde. Physical contact of your skin and clothing should be avoided.
- 8) Wear old clothes and a long-sleeved lab coat while working with the cadaver. Lab coats should not be worn outside the lab.
- 9) No open-toes shoes or sandals are allowed in the lab. Wear shoes that cover your entire foot.
- 10) Contact lens wearers should be aware that chemical fumes can pass into gas permeable and soft lenses. These fumes irritate the cornea. Protective glasses (prescription or safety glasses) are recommended to protect against chemical splashes. Know the location of the eyewash station before you begin.
- 11) If you are pregnant, or believe you may be pregnant, you may NOT participate in the laboratories until you provide Dr. Minns with written documentation from your obstetrician that verifies an understanding of the chemicals to which you and your fetus are being exposed while in the presence of the cadavers.
- 12) No foods, drinks, gum or the application of makeup are allowed in the lab.

13) Respirators can be purchased for use in the lab, if desired.

14) Wash hands prior to leaving the lab.

Important Dates and Assigned Readings (this may be amended by Dr. Minns during the Semester)

Day of the week	Dates	Monday	Readings
Monday	Jan. 26	Review Syllabus and Course Policies Introduction to BIOH370	
Lab 1	1/27-1/29	The Endocrine System	Tortora pp. 615-660 Gilroy Atlas
Wednesday	Jan. 28	The Endocrine System	615-660
Friday	Jan. 30	Endocrine System	615-660
Sunday	Feb. 1	Pre-term Assessment due Lecture Chapter 18 Quiz due	
Monday	Feb. 2	Endocrine System	615-660
Lab 2	2/3-2/5	Blood	Tortora pp. 661-687
Wednesday	Feb. 4	Endocrine System	615-660
Friday	Feb. 6	The Cardiovascular System: Blood	661-687
Sunday	Feb. 8	Lecture Chapter 19 Quiz due	
Monday	Feb. 9	The Cardiovascular System: Blood	661-687
Lab 3	2/10-2/12	Heart Anatomy	Tortora pp. 688-728 Gilroy Atlas
Wednesday	Feb. 11	The Cardiovascular System: The Heart	757-801
Friday	Feb. 13	The Cardiovascular System: The Heart	757-801
Sunday	Feb. 15	Lecture Chapter 20 quiz due	
Monday	Feb. 16	No Class- President's Day	
Lab 4	2/17-2/19	Heart Physiology and Blood Pressure Lab Physiology demo- ECG's and interpreting rhythm strips Physiology of Circulation	Tortora Chap. 688-728 Gilroy Atlas

Wednesday	Feb. 18	The Cardiovascular System: The Heart	688-728
Friday	Feb. 20	The Cardiovascular System: The Heart	688-728
Sunday	Feb. 22	Lecture Chapter 21 Quiz due	
Monday	Feb. 23	The Cardiovascular System: Blood vessels and hemodynamics	729-799
Lab 5	2/24-2/26	Blood Vessels Vessels of the Head, Neck and Upper Extremity Cardiology Case Study Due 2/26 on Lab Moodle Page	Tortora pp. 729-798 Gilroy Atlas -
Wednesday	Feb. 25	The Cardiovascular System: Blood vessels and hemodynamics	729-799
Friday	Feb. 27	The Cardiovascular System: Blood vessels and hemodynamics	729-798
Monday	March 2	Lecture Exam 1	
Tuesday	March 3	Lecture Chapter 22 Quiz due	
Lab 6	3/3-3/5	Blood Vessels Vessels of the Abdomen and Lower Extremity	Tortora pp. 729-798 Gilroy Atlas
Wednesday	March 5	The Lymphatic System and Immunity	799-839
Friday	March 7	The Lymphatic System and Immunity	799-839
Monday	March 9	The Lymphatic System and Immunity	799-839
Lab Practical	3/10-3/12	****Lab Practical #1**** (labs 1-6)	
Wednesday	March 11	The Respiratory System	840-885
Friday	March 13	The Respiratory System <u>UGTA Applications for 2014-2015 year are due by 5pm in the DBS office (HS building)</u>	840-885
Sunday	March 15	Lecture Chapter 23 Quiz due	
Monday	March 16	Montana State Science Fair- no class Judge the science fair for extra credit!	
Lab 7	3/17-3/19	Lymphatics and Immune System	Tortora pp. 799-839
Wednesday	March 18	The Respiratory System	840-885

Friday	March 20	The Digestive System	886-939
Sunday	March 22	Lecture Chapter 24 and 25 Quiz due	
Monday	March 23	The Digestive System (Dr. Simmons)	886-939
Lab 8	3/24-3/26	Anatomy of the Respiratory System	Tortora 840-885 Gilroy Atlas
Wednesday	March 25	The Digestive System	886-939
Friday	March 27	Nutrition and Metabolism	940-978
Monday	March 30	Spring Break- no class	
Wednesday	April 1	Spring Break- no class	
Friday	April 3	Spring Break- no class	
Monday	April 6	Nutrition and Metabolism	940-978
Lab 9	4/7-4/9	Physiology of Respiration Physiology demo: Spirometric testing and interpretation	Tortora pp. 840-885 Gilroy Atlas
Wednesday	April 8	Lecture Exam 2	
Friday	April 10	The Urinary System	979-1022
Sunday	April 12	Lecture Chapter 26 Quiz due	
Monday	April 13	The Urinary System	979-1022
Lab 10	4/14-4/16	Digestive System	Tortora 886-939 Gilroy Atlas
Wednesday	April 15	The Urinary System	1065-1109
Friday	April 17	UMCUR- no class; attend UMCUR instead (get extra credit!)	
Sunday	April 19	Lecture Chapter 27 Quiz due	
Monday	April 20	The Urinary System/ Fluid, Electrolyte and Acid-Base Balance	979-1022 1023-1040
Lab 11	4/21-4/23	Urinary System Physiology demo: Urinalysis testing and interpretation	Tortora 979-1022 Gilroy
Wednesday	April 22	Fluid, Electrolyte and Acid-Base Balance	1023-1040
Friday	April 24	Fluid, Electrolyte and Acid-Base Balance	1023-1040
Sunday	April 26	Lecture Chapter 28 quiz due	
Monday	April 27	The Reproductive System	1041-1088
Lab 12	4/28-4/30	Reproductive System – Male and Female	Tortora 1041-1088 Gilroy
Wednesday	April 29	The Reproductive System	1041-1088
Friday	May 1	The Reproductive System	1041-1088
Sunday	May 3	Lecture Chapter 29 quiz due	
Monday	May 4	Development and Inheritance	1105-1127
Lab Practical	5/5-5/7	****Lab Practical #2****	

		(labs 7-12)	
Wednesday	May 6	Development and Inheritance Lecture Post-term Assessment Due	1105-1127
Friday	May 8	Development and Inheritance	1105-1127
Thursday	May 14	Lecture Final Exam 10:10am-12:10pm	

Laboratory Specific Dates and Learning Outcomes

Dates Tues-Thurs	Topic	Learning Outcomes	Assigned Readings
		HAPS Mod B: Students who have completed this section of the course should be able to explain the basic concept of homeostasis and how homeostatic mechanisms apply to body systems.	
1/27-1/29	The Endocrine System	HAPS Mod J: Students who have completed this section of the course should be able to identify and describe the major gross and microscopic anatomical components of the endocrine system and explain the functional roles of their respective hormones in communication, control, and integration.	Tortora pp. 615-660 Gilroy Atlas
2/3-2/5:	Blood Physiology demo: Blood typing, Formed element identification, homeostatic imbalances of the blood	HAPS Mod K: Students who have completed this section of the course should be able to identify and describe the major gross and microscopic anatomical components of the cardiovascular system and explain their functional roles in transport and hemodynamics.	Tortora pp. 661-687
2/10-2/12	Heart Anatomy		Tortora pp. 688-728 Gilroy Atlas
2/17-2/19	Heart Physiology/Blood Pressure Physiology demo- ECG's and interpreting rhythm strips Physiology of Circulation		Tortora Chap. 688-728 Gilroy Atlas
2/24-2/26	Blood Vessels Vessels of the Head, Neck and Upper Extremity		Tortora pp. 729-798 Gilroy Atlas -

3/3-3/5	Blood Vessels Vessels of the Abdomen and Lower Extremity		Tortora pp. 729-798 Gilroy Atlas
3/10-3/12	****Lab Practical #1****	Covers labs 1-6	
3/17-3/19	Lymphatics and Immune System	HAPS Mod L: Students who have completed this section of the course should be able to identify and describe the major gross and microscopic anatomical components of the lymphatic system and explain their functional roles in fluid dynamics and immunity.	Tortora pp. 799-839
3/24-3/26	Anatomy of the Respiratory System	HAPS Mod M: Students who have completed this section of the course should be able to identify and describe the major gross and microscopic anatomical components of the respiratory system and explain their functional roles in breathing/ventilation and in the processes of external and internal respiration.	Tortora 840- 885 Gilroy Atlas
4/1-4/3	Spring Break! No Labs		
4/7-4/9	Physiology of Respiration Physiology demo: Spirometric testing and interpretation !		Tortora pp. 840-885
4/14-4/14	Digestive System	HAPS Mod N: Students who have completed this section of the course should be able to identify and describe the major gross and microscopic anatomical components of the digestive system and explain their functional roles in digestion, absorption, excretion and elimination. HAPS Mod O: Students who have completed this section of the course should be able to explain the functional relationship among cellular, tissue and organ level metabolism, the role nutrition plays in metabolism, and the mechanisms by which metabolic rate is regulated in the body.	Tortora 886- 939 Gilroy Atlas
4/21-4/23	Urinary System Physiology demo: Urinalysis testing and interpretation	HAPS Mod P: Students who have completed this section of the course should be able to identify and describe the major gross and microscopic anatomical components of the urinary system and explain their functional roles. HAPS Mod Q: Students who have completed this section of the course should be able to identify and describe the physiology of the homeostatic	Tortora 979- 1022

		mechanisms that control fluid/electrolyte and acid/base balance.	
4/28-4/30	Reproductive System – Male and Female	HAPS Mod R: Students who have completed this section of the course should be able to identify and describe the major gross and microscopic anatomical components of the reproductive system and explain their functional roles in reproduction and inheritance.	Tortora 1041-1088 Gilroy
5/5-5/7	****Lab Practical #2****	On labs 7-12
